- Output 30W 5V 6A max
- Size 155 x 125 x 65mm
- Weight 400g
- Part no 682002

Multiple USB-port charging station

USB charging station can charge up to 5 devices simultaneously. Equipped with smart IC chipset, fast charging ports, over-charge and over-heat protection, the unit allows for easy and efficient charging.

Connect the IRR-1 receiver to the charger by using a micro-USB cable. Just plug the USB end of the cords into the side of the charging station, set the receiver on its side with the charging port facing the cable, and plug it in to charger. The charging station plugs directly into the wall, taking up only one outlet to charge up to five devices at a time.

1.5m (2-pin) connect cable is included.
