Universal Switcher with HDMI 2.0 connectivity and USB 3.1 Gen1 features

The **UCX-2x1-H30 universal** switcher enhances and extends the possibilities of a meeting room and allows meeting participants to easily use their own devices such as laptops, and preferred video conference platforms while also to utilize the available assets of the meeting space, just like the HDMI displays, room cameras and other USB peripherals.

The device is designed to be a centerpiece of any collaboration space, and can be connected to **two USB peripherals** via USB-A type connectors.

Hosts then can connect their own devices to the **UCX-2x1-H30** and gain control over the rooms peripherals. By simply using a combination of **HDMI 2.0** and **USB 3.1 Gen1** connections, video and audio signals can be transferred up to a resolution of **4K@60Hz 4:4:4** and **data speeds up to 5 Gbps**.

The device allows up to two hosts to be connected to the system, and also ensures quick and easy switching between the users. Two sets of HDMI 2.0 and USB inputs makes this universal switcher a perfect fit for smaller meeting areas, involving 4-8 people.

Automated room control features are also included through **GPIO ports**, besides of **RS-232** and occupancy sensor connectivity. The switcher also thrives when it comes to **audio capabilities**, offering **analog audio de-embedding** feature.

Security is always a key concern in the corporate world, therefore our engineers ensured that the UCX-2x1-H30 adheres to the strictest security standards. A **secure corporate Ethernet interface** ensures secure device control and configuration under the SSH, SSL and HTTPS standards.

The Taurus UCX offers noiseless operation in most environments where conditions are considered regular, just like in a meeting room where temperatures do not exceed the low 20s in Celsius or about 70-75 in Fahrenheit. The built-in fan is designed to operate only if the device is installed in a cabinet or other environment with insufficient air-flow. We specified a maximum of 30dBA noise level for our ventilation system in a meeting room, to comply with the NC-30 és NR 30 standards.

In today's collaboration environments, it is key that the technology offers flexible and versatile ways for participants to unlock the full potential of a collaboration space and they clearly demand to not be limited by the default options offered by their meeting rooms.

The new **Taurus UCX product family** is Lightware's ground-breaking innovation offered for this increasingly growing demand for cutting-edge solutions in the world of Unified Communications.

Universal Switcher with HDMI 2.0 and USB-C connectivity

The **UCX-2x1-HC30 universal switcher** enhances and extends the possibilities of a meeting room and allows meeting participants to easily use their own devices such as laptops, and preferred video conference platforms while also to utilize the available assets of the meeting space, just like the HDMI displays, room cameras and other USB peripherals.

The device utilizes the **USB-C connectivity** for a simplified transmission of 4K video, audio, control signals and power, and allows data speeds of up to **5 Gbps** under the **USB 3.1 Gen1** and allowing video resolution capabilities up to **4K@60Hz at 4:4:4**.

Devices such as laptops that do not come with USB-C connectivity can also be connected quickly and easily, using a combination of **HDMI 2.0** and **USB 3.1 Gen1** connections without compromising on either video resolution or data speeds.

The device allows up to two hosts to be connected to the system, and also ensures quick and easy switching between these hosts, making this universal switcher a perfect fit for smaller meeting areas, involving 4-8 people.

Automated room control features are also included through **GPIO ports**, besides of **RS-232** and occupancy sensor connectivity, and the switcher also thrives when it comes to **audio capabilities**, offering **analog audio de-embedding**.

Secure corporate Ethernet interfaces ensure secure device control and configuration under the SSH, SSL and HTTPS standards, whilst the device can also be securely connected to a closed network of room control devices such as wall panels, or routed to the corporate system for additional control options, all via separate Ethernet layers.

The Taurus UCX offers noiseless operation in most environments where conditions are considered regular, just like in a meeting room where temperatures do not exceed the low 20s in Celsius or about 70-75 in Fahrenheit. The built-in fan is designed to operate only if the device is installed in a cabinet or other environment with insufficient air-flow. Universal Switcher with USB-C connectivity and Dante Audio

The **UCX-2x1-HC30D universal switcher** enhances and extends the possibilities of a meeting room and allows meeting participants to easily use their own devices such as laptops, and preferred video conference platforms while also to utilize the available assets of the meeting space, just like the HDMI displays, room cameras and other USB peripherals.

The device utilizes the **USB-C connectivity** for a simplified transmission of 4K video, audio, control signals and power, and allows data speeds of up to **5 Gbps** under the **USB 3.1 Gen1** and allowing video resolution capabilities up to **4K@60Hz at 4:4:4**.

Devices such as laptops that do not come with USB-C connectivity can also be connected quickly and easily, using a combination of **HDMI 2.0** and **USB 3.1 Gen1** connections without compromising on either video resolution or data speeds.

The device allows up to two hosts to be connected to the system, and also ensures quick and easy switching between these hosts, making this universal switcher a perfect fit for smaller meeting areas, involving 4-8 people.

Automated room control features are also included through **GPIO ports**, besides of **RS-232** and occupancy sensor connectivity.

The switcher also thrives when it comes to **audio capabilities**, offering **analog audio de-embedding** feature as well as support for **DANTE/AES67** network connection to send DANTE/AES67 audio stream directly to a dedicated audio system.

Security is always a key concern in the corporate world, therefore our engineers ensured that the **UCX-2x1-HC30D** adhere to the strictest security standards.

Secure corporate Ethernet interfaces ensure secure device control and configuration under the SSH, SSL and HTTPS standards, whilst the device can also be securely connected to a closed network of room control devices such as wall panels, or routed to the corporate system for additional control options, all via separate Ethernet layers.

The Taurus UCX offers noiseless operation in most environments where conditions are considered regular, just like in a meeting room where temperatures do not exceed the low 20s in Celsius or about 70-75 in Fahrenheit. In today's collaboration environments, it is key that the technology offers flexible and versatile ways for participants to unlock the full potential of a collaboration space and to not be limited by the default options offered by their meeting rooms.

The new **Taurus UCX product family** is Lightware's groundbreaking innovation offered for the increasingly growing demand for cutting-edge solutions in the world of Unified Communications.

Universal Switcher with HDMI 2.0 and USB-C connectivity

The **UCX-4x2-HC30 universal switcher** enhances and extends the possibilities of a meeting room and allows meeting participants to easily use their own devices such as laptops, and preferred video conference platforms while also to utilize the available assets of the meeting space, just like the HDMI displays, room cameras and other USB peripherals.

The device utilizes the **USB-C connectivity** for a simplified transmission of 4K video, audio, control signals and power, and allows data speeds of up to **5 Gbps** under the **USB 3.1 Gen1** providing video resolution capabilities up to **4K@60Hz at 4:4:4**.

Devices such as laptops that do not come with USB-C ports can also be connected quickly and easily, using a combination of **HDMI 2.0** and **USB 3.1 Gen1** connections without compromising on either video resolution or data speeds.

The device allows up to four hosts to be connected to the system, and also ensures quick and easy switching between these hosts, making this universal switcher a perfect fit for smaller meeting areas, involving 6-12 people.

Automated room control features are also included through **GPIO ports**, besides of **RS-232** and occupancy sensor connectivity, and the switcher also thrives when it comes to **audio capabilities**, offering **analog audio de-embedding**.

Security is always a key concern in the corporate world, therefore our engineers ensured that the **UCX-4x2-HC30** adhere to the strictest security standards.

Secure corporate Ethernet interfaces ensure secure device control and configuration under the SSH, SSL and HTTPS standards, whilst the device can also be securely connected to a closed network of room control devices such as wall panels, or routed to the corporate system for additional control options, all via separate Ethernet layers.

Warranty		3 years					

MMX4x2-HDMI-USB20-L

MMX4x2-HDMI-USB20-L is an integrator-friendly, 4x2 matrix switcher for HDMI video and USB2.0 peripherals.

It has four HDMI inputs and two independent HDMI outputs, as well as a USB 2.0 layer that provides the switching of four external USB peripherals (USB devices such as webcam, speakerphone, multitouch display, etc.) to four independent host computers or laptops. The 'Power Switch Delay' feature allows sinks and displays to detect any changes in the source signal, by cutting power off between the camera and the device for 2 seconds.

Unique USB functions allow seamless integration in Unified Communication and small Video Conference rooms. The USB "Host5vSense" function recognizes when a USB cable is connected and performs condition triggering for the Event Manager. For example, switch USB devices to the last connected USB laptop if configured accordingly. The "Device5vEnable" turns ON or OFF peripherals' 5 Volt over the USB cable.

One of the USB-A type connectors is capable to power connected devices with 1000mAh at 5V, and therefore allows remote charging for certain devices, such as the Huddly Go and Huddly IQ cameras, that require at least 900mAh.

"HostSelect 0" disconnects Cisco Room Kit Mini and allows Touch 10 control unit to switch between Webcam and Webex video conferencing operation modes.

The device offers two individual RS-232 interfaces to allow independent control of two separate 3rd party devices, such as a Cisco Room Kit Mini or an external display.

MMX4x2-HDMI-USB20-L and built-in Event Manager automation makes the meeting room easy, intuitive and hassle-free; it detects powered computers, turns on the screen and camera, and prepares for the next call. Based on the specific configuration it allows auto-switch for USB and video signals. In other cases USB may not follow video, according to the application.

Audio can be de-embedded from the HDMI signal to a balanced 5-pole Phoenix (Euroblock) port and external audio signal can be embedded into the HDMI stream from another 5-pole Phoenix input port. The volume and gain properties of the audio signal can be modified at both input and output.

HDMI connectors are 4K capable and HDCP compliant and additional control options are served by the USB, RS-232, IR (in and out) and Ethernet ports.

Features

- 4 x 2 Matrix Switcher with HDMI 1.4 ports
- 4K/UHD (30Hz RGB 4:4:4, 60Hz YCbCr 4:2:0)
- USB 2.0 Host switching layer for external USB 2.0 peripherals (Camera; Touch sensor; Speakerphone, etc.)
- 4 x USB 2.0 Device peripherals
- 4 x USB 2.0 Host computers
- USB Host switching is compatible with Windows, MacOS and any other operating system
- "Host5vSense" triggers Event Manager
- "Device5vEnable" function turns ON or OFF peripherals' 5 V USB power
- "HostSelect 0" disconnects Cisco Room Kit Mini's webcam
- USB-C Laptop Support (With external adaptors)
- 1 x 5-pole Phoenix connector for balanced analog audio embedding
- 1 x 5-pole Phoenix connector for balanced analog audio de-embedding
- Analog audio volume control
- Event Manager
- Command injection on IR and RS-232 connections
- Advanced EDID Management
- Zero frame delay

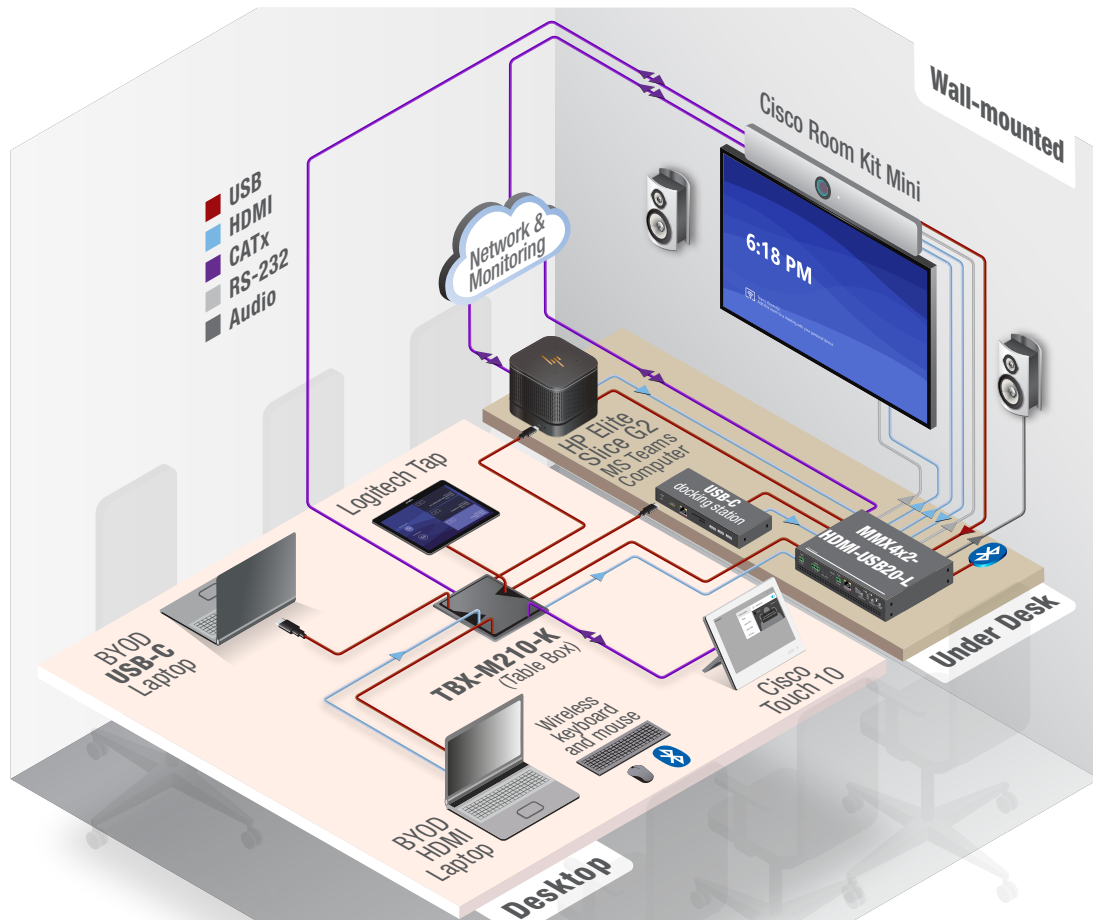

Applications

- Meeting and conference rooms
- Huddle Rooms with Soft VC

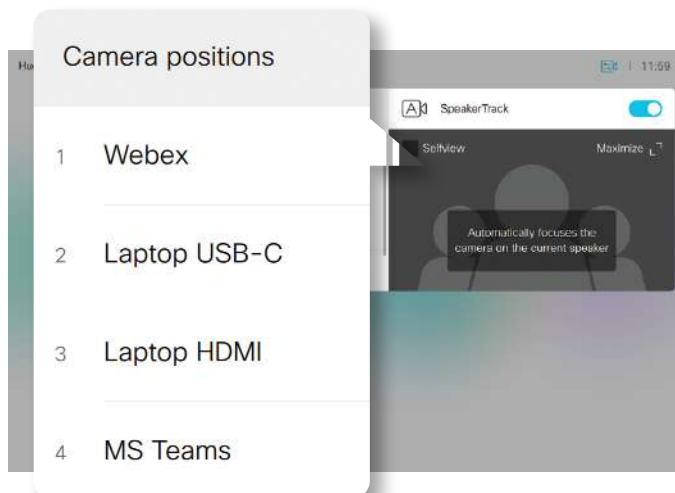

Connectors

Digital video inputs:	4 x HDMI connector
Digital video outputs:	2 x HDMI connector
Balanced audio input:	5-pole Phoenix (Euroblock) connector
Balanced audio output:	5-pole Phoenix (Euroblock) connector
Ethernet:	3 x RJ45
USB device:	4 x USB-A
USB power:	1 x 1000 mA & 3 x 500mA
USB host:	4 x USB-B
USB control:	mini-USB-B connector
Control:	6 x GPIO, 8-pole Phoenix (Euroblock)
IR in and out:	3.5 mm jack
Serial port:	2 x RS-232 Serial Port
Power:	Locking DC connector (2.1 / 5.5 mm)

Cisco Webex and MS Teams mixed Application

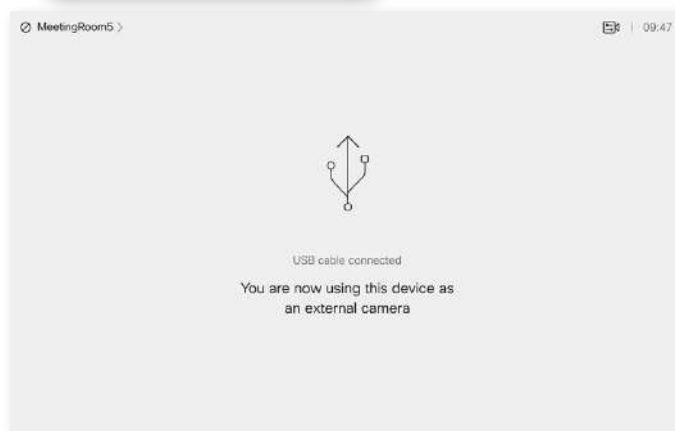

MMX4x2-HDMI-USB20-L

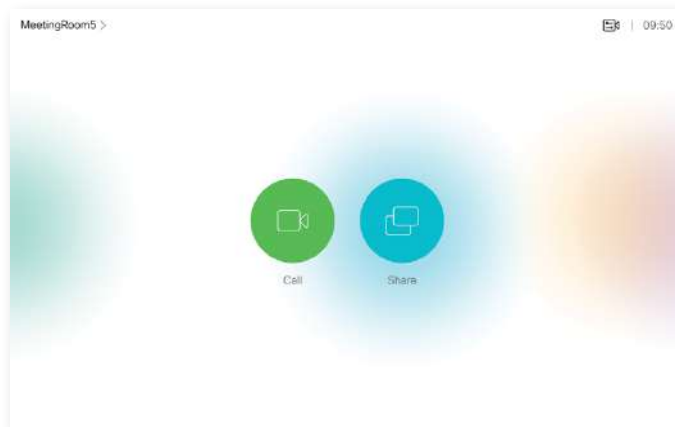

The Camera Selector Icon on the top right corner of the screen provides access to the Camera Selector Menu.

In the Camera Selector Menu users can choose from a list of pre-defined and per-configured camera options.

Once the required camera is selected, the Lightware matrix sets up the system to be immediately ready for collaboration on the chosen VC platform.

When the Webex RoomKit Mini is utilized as a USB camera, the 'Do-not-disturb' screen is displayed on the Touch10 to advise users about the current status.

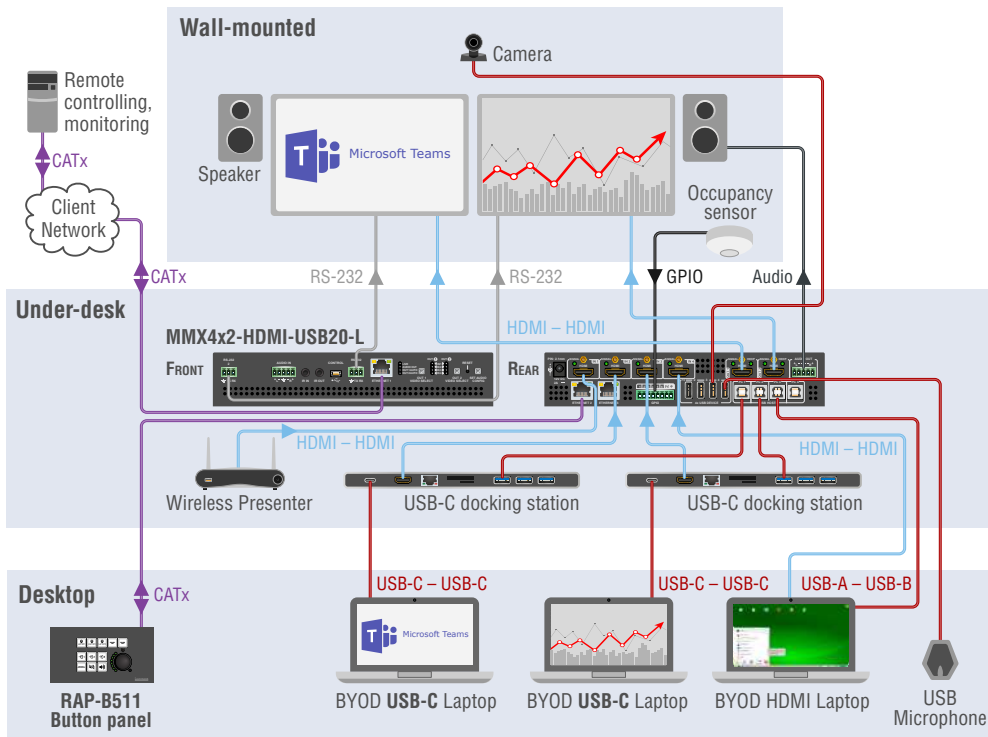

Upon tapping the Touch10, users are presented with the Main Screen in Normal Mode where they can either initiate a call using the Cisco Webex platform or enter the Share Menu to choose from additional input options.

The desired input device can also be chosen inside the Share Screen Menu where all available options are displayed.

The currently active input device is highlighted in green and its content is displayed on the room's main screen.

Dual Screen Application with Wireless Presenter

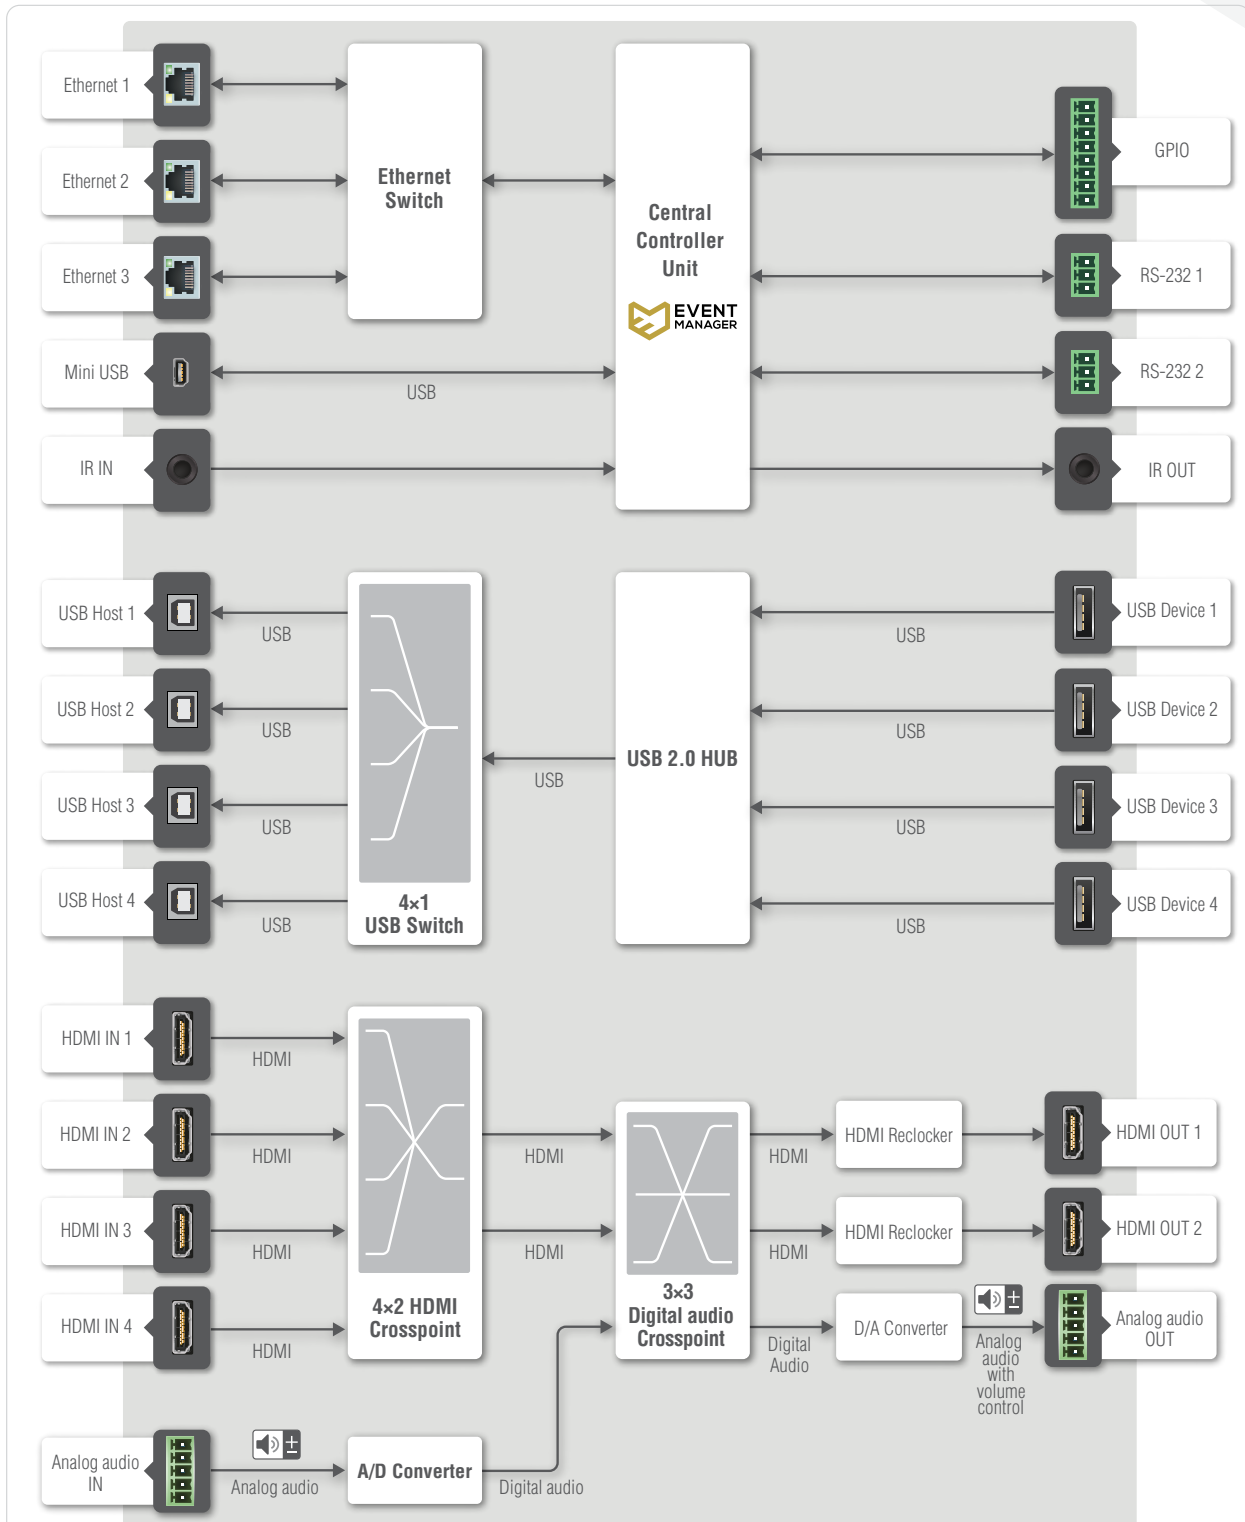

RAP-B511
Button Panel

MMX4x2-HDMI-USB20-L

MMX4x2-HDMI-USB20-L Port Diagram

MMX8x8-HDMI-A-USB20 is an integrator-friendly, 8x8 matrix switcher for HDMI video and USB2.0 peripherals.

It has eight HDMI inputs and eight independent HDMI outputs, as well as a USB 2.0 layer that provides the switching of four external USB peripherals (such as webcam, speakerphone, multitouch display, etc.) to four independent computers or laptops. The 'Power Switch Delay' feature allows sinks and displays to detect any changes in the source signal, by cutting power off between the camera and the device for 2 seconds.

The MMX8x8-HDMI-4K-A-USB20 offers 4+2 balanced, bi-directional, 5-pole Phoenix audio ports for embedding and de-embedding audio signals. Unique USB functions allow seamless integration in Unified Communication and small Video Conference rooms. The "USB 5V Host Detect" function recognizes when a USB cable is connected and performs condition triggering for the Event Manager. For example, switch USB devices to the last connected USB laptop if configured accordingly. The "USB 5V PWR Switch" turns ON or OFF peripherals' 5Volt over the USB cable.

One of the USB-A type connectors is capable to power connected devices with 1000mAh at 5V, and therefore allows remote charging for certain devices, such as the Huddly Go and Huddly IQ cameras, that require at least 900mAh.

"USB Disconnect" helps Cisco Room Kit Mini and Touch 10 control unit to switch between Webcam and Webex video conferencing operation modes. It also solves the problem when Cisco Touch 10 gets locked in USB webcam operation and touch buttons become unavailable.

MMX8x8-HDMI-A-USB20 and built-in Event Manager automation makes the meeting room easy, intuitive and hassle-free: it detects powered computers, turns on the screen and camera, and prepares for the next call. Based on the specific configuration it allows auto-switch for USB and video signals. In other cases USB may not follow video, according to the application.

The MMX8x8-HDMI-A-USB20 seamlessly integrates with Cisco Rooms, and also offers users unprecedented flexibility to utilize the Cisco Webex Room kits as a USB camera if they prefer to use a 3rd party video conference platform.

Features

- Multiple USB 2.0 connectivity for any type of USB devices (Camera, speakerphone, touch monitor, USB-HID devices etc...)
- USB-C Source Support (With external adaptors)

- USB 2.0 Host switching layer for external USB 2.0 peripherals (Camera; Touch sensor; Speakerphone, etc.)
- 4 x USB 2.0 Device peripherals
- 4 x USB 2.0 Host computers
- USB Host switching is compatible with Windows, MacOS and any other operating system
- "Host5vSense" triggers Event Manager
- "Device5vEnable" function turns ON or OFF peripherals' 5 V USB power
- "HostSelect 0" disconnects Cisco Room Kit Mini's webcam
- USB-C Laptop Support (With external adaptors)
- Separate USB 2.0 Host switching layer for multiple USB hosts and USB devices
- Cisco VC room integration compatibility
- Advanced control feature pack for 3rd party video conference collaboration
- Audio embedding and de-embedding
- 5-pole Phoenix balanced analog audio connectors
- Advanced EDID Management
- Supports HDMI 4K signal formats (4K UHD @30Hz RGB 4:4:4 or @60Hz YUV 4:2:0, up to 9 Gbps)
- Command injection on RS-232 and IR ports
- Built-in Event Manager automation feature
- No signal latency, zero frame delay

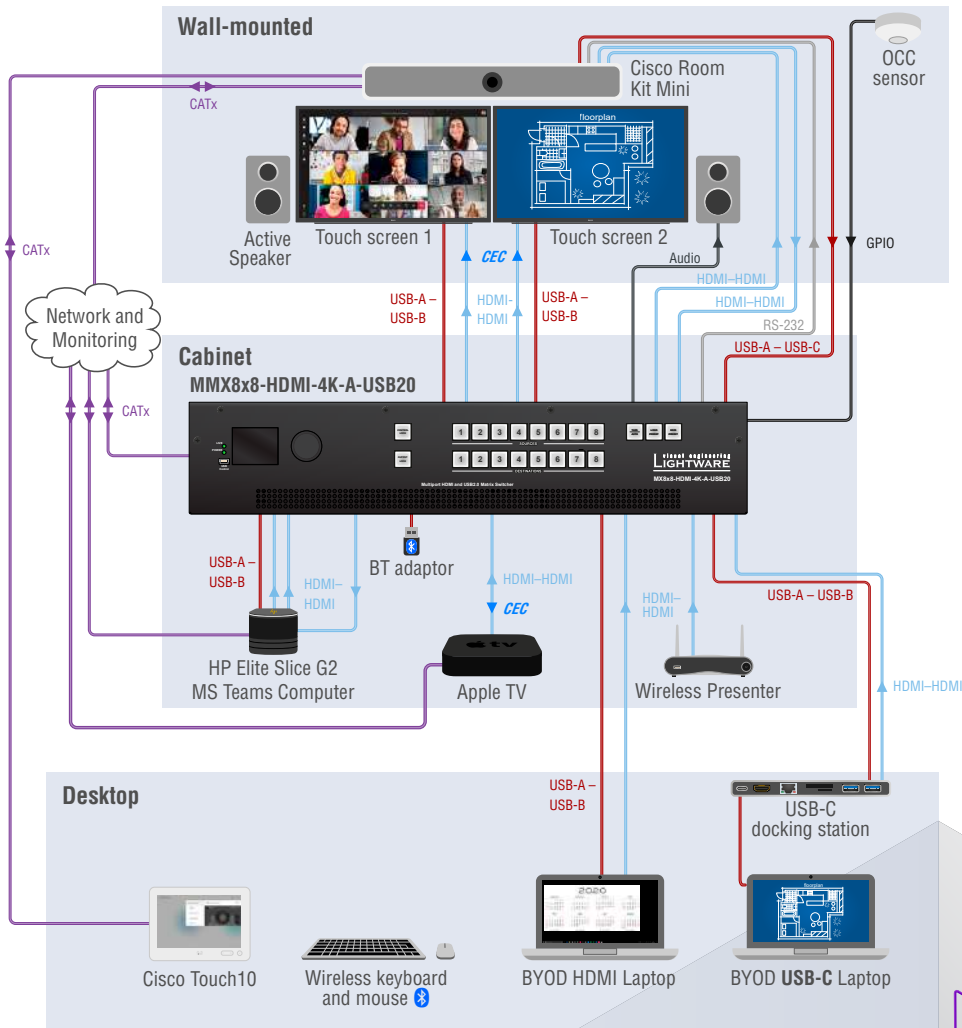

Applications

- Meeting and conference rooms
- Huddle Rooms with Soft VC

Connectors

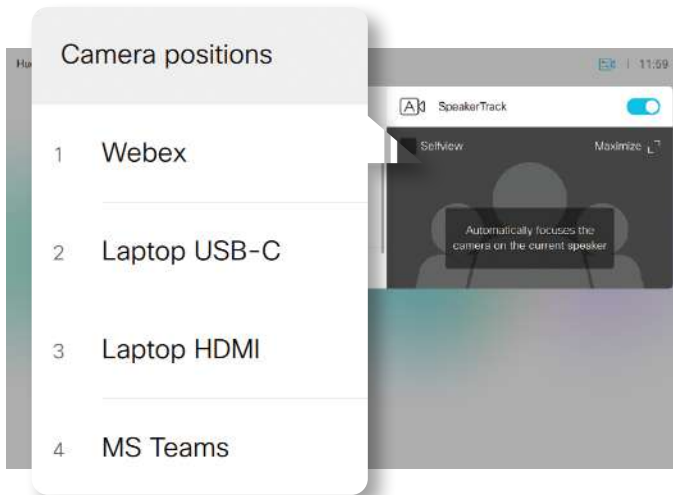

Digital video inputs:	8 x HDMI connector
Digital video outputs:	8 x HDMI connector
Balanced audio I/O ports:	6 x 5-pole Phoenix (Euroblock) connector
Ethernet:	3 x RJ45
USB device:	4 x USB-A
USB power:	1 x 1000mA & 3 x 500mA
USB host:	4 x USB-B
USB control:	mini-USB-B connector
Control:	6 x GPIO, 8-pole Phoenix (Euroblock)
IR in and out:	3.5 mm jack
Serial port:	2 x RS-232 Serial Port
Serial/IR configurable port:	2 x 2-pole Phoenix connector
Power:	Locking DC connector (2.1 / 5.5 mm)

MMX8x8-HDMI-4K-A-USB20

Small Room Application
